

Factory Fire Safety Checklist for UK Businesses

- Has a suitable fire risk assessment been completed?
- Has the fire risk assessment been reviewed after layout, staffing, machinery, or process changes?
- Are the correct extinguishers installed for each risk area?
- Are escape routes clear?
- Are staff trained in fire procedures?
- Are fire wardens or fire marshals appointed where appropriate?
- Is fire safety signage clear and up to date?
- Are maintenance records available?
- Are alarms, emergency lighting, and fire doors checked as part of a wider fire safety management?
- Is there a clear incident response plan?
- Are contractors and visitors considered?
- Are high-risk production or storage areas reviewed separately?
